

## CASE STUDY - Compliance

### THE CLIENT

Cancer Council Queensland (CCQ) was established in 1961 and now has headquarters in Brisbane and six offices in the major regional areas throughout the state.

There are more than 51 volunteer branches across the state - west to Mt Isa, north to Cooktown and south to Tweed Heads.

Cancer Council Queensland is not government funded and relies entirely on public support through donations. CCQ now employs over 200 full-time staff.

### THE CHALLENGE

CCQ uses Microsoft applications throughout the organization to enable users to work quickly, efficiently and to adhere to industry and organizational standards.

CCQ provides users access to a wide variety of Microsoft applications depending their role within the organization and their individual requirements.

Managing both the growth of the organization, in addition to the continual release of new versions of the Microsoft applications has illustrated the difficulties in maintaining accurate licensing coverage whilst ensuring users are on current versions.

Therefore, current versions and adequate numbers of licenses were not always available.

Continuing projected growth of the organization and continuous release on new versions of Microsoft applications only made this situation more difficult.

### THE SOLUTION

Perform a licensing audit of all Microsoft licenses across the entire organisation. Using this data and

projected growth, acquire adequate Microsoft licensing with Microsoft Software Assurance through a Microsoft Licensing agreement.

### THE BENEFITS

Adequate Microsoft licenses are now available for all required applications throughout the organization, ensuring productivity, user satisfaction and licensing compliance standards are maintained.

All new application versions are available for the entire term of the Microsoft Licensing Agreement with no additional licensing cost incurred by CCQ.

The ongoing cost benefit can be maintained through the renewal of Microsoft Software Assurance, providing a significant reduction in the cost of maintaining current Microsoft application versions.

### ABOUT SUNDATA

Sundata was founded in 1986 and is headquartered in Brisbane, Australia. The experience of our team and focus on customer service has evolved into an organization that supports clients all over Australia. Currently over 150 corporate, government and school clients look to us to provide quality products, service and advice.

Our approach in what we offer our clients remains consistent with the simplicity of our business ethos: LISTEN. RESPOND. DELIVER.
